

Press Release

GREENBROZ INC LAUNCHES ARTISAN DRY TRIMMER

For immediate release: GreenBroz Inc., the global leader in harvesting solutions for the legal cannabis industry, proudly announces the launch of the cannabis industry's first artisan dry trimmer, the GreenBroz 215 Dry Trimmer.

The 215 Dry Trimmer processes 2-4 pounds per hour while allowing the operator to remain in control of the trimming process until they have achieved their desired trim. Additionally, the 215 Dry Trimmer weighs only 41 pounds and requires little power, giving it the flexibility to trim in remote locations.

GreenBroz employs patented blade technology to facilitate the most gentle small batch trimming experience on the market today, allowing the flower to gently roll through the trim chamber while avoiding harmful verticle drops or tumbles that can damage your flower.

Streamlined features like a forward/reverse switch, adjustable timer, and a brush arm inside the trim chamber provide flexibility to customize the trimming experience while still maintaining an intuitive operation that produces great results, making this mighty little trimmer perfect for any small or medium-sized cultivation. Lastly, the GreenBroz 215 Dry Trimmer produces a uniform trim material that is left brilliantly intact for further processing, allowing cultivators to turn trim into further products and profits.

"When I was growing up, I saw, firsthand, the impact that overpriced machinery can have on a growing business. So, when I started GreenBroz, I made it a goal of mine to produce equipment that not only solves problems but was affordable for all levels of business. The 215 Dry Trimmer hits this nail right on the head, offering time, money and labor savings with an ROI of weeks, if not days. Owners can then create a better paying, skilled position for the machine operator. In addition, the time saved will allow a shift in focus to other tasks that will allow the business to grow at a faster, more competitive rate. Overall, this machine solves more than just a trimming problem; it solves a time, money, and labor bottleneck that impacts every growing business. We're proud to be able to bring this solution to market."
