

Press Release

GREENBROZ INC UPDATES FLAGSHIP 420 DRY TRIMMER

For immediate release: GreenBroz Inc., the global leader in harvesting solutions for the legal cannabis industry, proudly announces upgrades to the GreenBroz 420 Dry Trimmer.

The 2017 version of the GreenBroz 420 Dry Trimmer (8-12 lbs. per hour) comes with several additional features, including an LED work light for low light situations, variable speed control, stainless steel down chute, and a stainless steel side shelf, among other functional improvements.

The speed control knob allows trimmers to adjust the revolutions per minute of the top blade, choosing anywhere between 1-20 rpm. This allows the operator to use the machine as gently as is needed for the specific strain and desired trim result, further improving on what is already the most customizable trimming experience on the market today.

The stainless steel down chute directs trim material into a collection bin beneath the machine. The trim material is perfect for further processing in the GreenBroz Alchemist Trichome Extractor, a machine that separates the crystals from the trim, creating more products for your business.

"Here at GreenBroz, we're constantly striving to improve, innovate, and implement the latest ideas and technology into our machines. While our 420 Dry Trimmer is one of our flagship machines, we know it can always be better, so we are constantly listening to our clients' feedback, as well as our engineers' suggestions, to continually produce the best harvesting equipment possible. The upgrades and additions to our 420 Dry Trimmer make it easier than ever for harvesters to achieve their desired trim, be it for commercial wholesale, or the retail market. This machine provides a level of customizable automation that allows cultivators to capture their flower at its best, pass that quality on to their end consumer, and maintain their excellent brand reputation.
