

Press Release

GREENBROZ INC ANNOUNCES PARTNERSHIP WITH PUREPRESSURE LLC

For immediate release: GreenBroz Inc., the global leader in harvesting solutions for the legal cannabis industry, proudly announces a strategic partnership with PurePressure LLC.

In forming this strategic partnership, GreenBroz Inc. adds to its already impressive line of harvesting equipment, including two of the most well-respected rosin presses in the cannabis space today in the PurePressure Pikes Peak and Longs Peak models (among other products).

PurePressure's rosin presses pair perfectly with the GreenBroz Alchemist Trichome Extractor. The Alchemist sifts beautiful blond trichomes, which can be pressed into rosin, offering one of the purest solventless extraction techniques on the market.

PurePressure's heat plates are consistently noted as the best in the game, made with 100% 6061 aircraft grade aluminum. The temperature can be targeted to within 1 degree of accuracy, from 0°F to 300°F.

Pure Pressure was awarded the 'Best Rosin Press' at the '2018 Terpenes and Testing World Conference' and their machines are manufactured in-house at their Denver, Colorado facility.

"As a global leader in harvesting equipment for the cannabis sector, we are always searching for the latest and greatest technology to offer our client base, especially if it is a natural expansion to our product line. PurePressure produces the best rosin presses in the game and when the opportunity for partnership presented itself, it made sense for both sides to jump at the chance to work together. Additionally, PurePressure's team shares the GreenBroz 'Gentle. Quick. Quiet.' ethos while constantly striving to improve their offerings for their clients. In looking for potential partners in this developing industry, it is important that companies share in our vision to make our clients as successful as possible. We have no doubt that PurePressure meets that standard and we are excited to bring this partnership to market.
