GREENBROZ INC RELEASES CANNABIS SIZE SORTER

For immediate release: GreenBroz Inc., the global leader in harvesting solutions for the legal cannabis industry, proudly announces the official market release of the GreenBroz Sorter.

Easy to load, operate, and clean, the Sorter is a must-have for any medium to large scale cultivator who wants to improve the efficiency of their harvest without sacrificing the flower quality for which their brand is known.

The GreenBroz Sorter is constructed entirely of food-grade materials and will sort your flower in up to six adjustable size variations at a time. Simply load the flower into the feeding hopper, lock the dividers to the desired sizes, and turn on the belts to get sorting at a rate of 10-15 pounds every 10 minutes. The use of a conveyor system fosters an exponentially more gentle handling process than a vibration system, preserving your flower and maintaining quality throughout the process.

The Sorter's bands carry your flower along the top of the machine before exiting through the appropriate sizing area. The control panel regulates your main power source, conveyor belt, and an emergency stop switch that allows you to maintain full control of the machine.

"As GreenBroz continues to expand, we're constantly listening to our clients to identify bottlenecks in the harvesting process. While we have developed numerous machines that have been embraced by the industry, proper size sorting of flower has remained a pain point for nearly every operation. After nearly a year of research and development, GreenBroz is proud to release the Sorter, improving upon our already impressive offering of harvesting solutions for the cannabis space. The Sorter maintains the GreenBroz tradition of gentle, quick, and quiet operation, with a focus on maintaining the artisanal quality of the flower above all other considerations."
