

Press Release

GREENBROZ INC RELEASES ALCHEMIST TRICHOME EXTRACTOR

For immediate release: GreenBroz Inc., the global leader in harvesting solutions for the legal cannabis industry, proudly announces the official market release of the *GreenBroz Alchemist Trichome Extractor*.

The Alchemist 215 Trichome Extractor and the Alchemist 420 Trichome Extractor are two of the latest additions to the GreenBroz line of harvesting equipment. Similar to the GreenBroz 215 and 420 Dry Trimmers, the 215 and 420 Alchemist Trichome Extractor represent two different sizes of machines, with the 215 model being perfect for small to medium sized cultivations and the 420 model catering to medium to commercial scale operations.

The Alchemist Trichome Extractor is built from food-grade materials (stainless steel and high-density polyethylene). Both the 215 and 420 models come with four (4) 180 micron stainless steel screens which produce an ideal trichome extraction (15-25% by weight) for further processing. Please note that 80 and 130 micron screens are available as well.

An intuitive design yields a simple operating process whereby the user inserts their trim into the machine, adds pulverized dry ice (optional), closes the machine and turns it on. The Alchemist Trichome Extractor rotates end over end, separating the trichomes from the leaf while leaving plant matter in tact for further processing.

"The GreenBroz Alchemist Trichome Extractor is the perfect complement to our Dry Trimmers, which produce an intact, uniform trim that is perfect for extraction. This will ensure that you are truly getting the highest yield possible out of your product. Additionally, in keeping with GreenBroz tradition, these machines are simple to operate, easy to clean, and gentle on your product. The Alchemist operates solvent-free and is constructed from food-grade materials, so your clients can rest assured that the purity of your product is maintained throughout the process. We're thrilled to announce the official launch of these new products and anticipate a strong reception throughout the industry as well as our current clientele who already own and operate other GreenBroz Inc. products."
