LB PER DAY

MIN 8  
AVG 26.5  
MAX 31.5

### WEEK TWO+ PROFIT

MIN \$7,560  
AVG \$9,072  
MAX \$10,584

## The ROI Difference

We understand the secret to sell price is the quality of the end product. The gentle nature of our machines means you won't have to worry about low testing, unbearable noise, or damage to your bud structure.

Your customers can see, feel, and taste top-shelf quality, and our products will never take away from these aspects.

## BLADE TIP

Swapping Blades Can Lead to a **60%** Reduction In Cleaning Time

Time spent trimming is time spent making money. Spare blades pay for themselves by cutting cleaning times by 25 - 60%.

## How Was This Calculated?

Transparency is key, we asked our customers for the basis of these numbers (price per lb, trim times, lb per batch, cleaning time). These numbers may not match your ROI. Efficiency and return relies on operator skill, flower prep, and strain characteristics. Please contact us for info on how to best prep your flower and use your trimmer to max ROI.
