TROUBLE SHOOTING

ISSUE: Trimmer won't start:

• Make sure E stop is released.

ISSUE: Hard to insert or remove top blade:

- If there is tension between the motor shaft & "hub key", rotate the blade in the opposite direction, about half turn, to release the pressure.
- Make sure the hub & blade are aligned as loose hardware can prevent the hub and top blade from aligning with the motor shaft.

ISSUE: Top blade vibrates or chatters when rotating:

- Resin build up can cause vibrating/chattering of the blade as well. If it seems to be the case, clean blades per the protocol provided.
- Check for stems in blades.
- Check for loose hub screw.

ISSUE: HMI is black:

- Ensure control box is fully connected.
- Ensure E-Stop is released.
- Ensure machine is plugged into power.
